

Component	Property	Value
Labels - three for integers	Alignment	TaRightJustify
	Left	10
	Width	35

The form now looks like this:

## The SpinEdit-component: operations with integers

### What is a SpinEdit-component?

A component where the user can **choose** numbers as input. The component has a Value-property.

The SpinEdit-component is found on the Samples-page:

### Example 2: Simple calculation

The form has two SpinEdit-components (**sedOne**, **sedTwo**), labels, a button and a Close-button:
