

### 3. The UML–class diagram

#### What is an UML-class diagram?

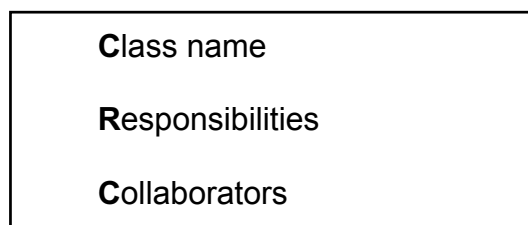

An UML-class diagram is used to represent **classes and subclasses**. All the subclasses have (inherit) the properties and methods from the general class.

### 4. CRC-cards

#### What are CRC-cards?

CRC-cards (CRC - **C**lass, **R**esponsibilities of a class and **C**ollaborators) are used to write the information on classes on a card. It contains information on the 1) class name, 2) responsibilities and 3) collaborators.

General example of a CRC-card
