

### Example 3: Display random numbers from 1 to 100

```
procedure TfrmNum.btnDisplayClick(Sender : TObject);  
type  
  TArr = array[0..9] of Integer;  
var  
  Num      : TArr;  
  Choose, J : Integer;  
begin  
  Randomize;  
  For J := 0 to 9 do  
    begin  
      Choose := Random(101);  
      Num[J] := Choose;           //Fill array with random numbers  
      lstDisplay.Items.Add ('Number ' + IntToStr(J)+ ' is: ' + IntToStr(Num[J]));  
    end;  
  end;  
end;
```

### Example 4: Display different letter styles

```
procedure TfrmTypes.btnDisplayClick(Sender: TObject);  
const  
  FontType : array[0..3] of String = ('Bold', 'Italic','Underline','STrikeOut');  
var  
  K, Choose      : Integer;  
begin  
  Randomize;
```
